

### Wonderful investment

NAOMI was a wonderful investment for our hospital. The low cost, the ease of use, and excellent quality has made us one of the most advanced and versatile facilities for radiography in our area.

### Greater number of radiographs, with less time and staff involvement

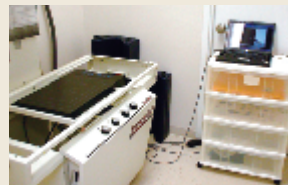

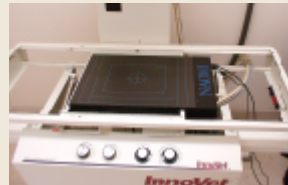

The speed with which we are able to process x-rays makes us able to take a greater number of radiographs, with less time and staff involvement, making us much more efficient!

### More space in the hospital, more time to spend elsewhere

NAOMI completely eliminates the need for a darkroom, giving us more space in the hospital, more time to spend elsewhere, and the convenient ability to transmit x-ray results to referral institution via email or CD.

### Our clients are constantly impressed with NAOMI's ability

Our clients are constantly impressed with NAOMI's ability to show x-rays to them on a monitor screen, and also like the rapidity with which we can take x-rays, decreasing the amount of time that the clients must be away from their pets, while we take radiographs.
